

## SmartSense T1 Sensor TM-T1SENSOR-T91

### Rechargeable Location and Condition Monitoring Sensor

The SmartSense T1 Sensor is an ultra-low-profile environmental sensor and data collector designed for applications that require portable and temporary monitoring. SmartSense T1 Sensors collect temperature and location information and upload the data to the SmartSense application via a common cellular connection.

### Features

- Low-profile form factor
- LTE-M cellular communication
- Flexible interval configuration
- Store-and-forward
- International multi-carrier support
- Precise GNSS location services (with fallback to cellular location)
- Integrates with SmartSense Asset Monitoring Solution
- Rechargeable via USB

### Specifications

Dimensions	55.4mm x 89mm x 11mm*
Weight	53g
Communication	LTE-M
Operating Regions	Global
Temperature Operating Range	-20°C to 65°C (-4°F to 149°F)
Temperature Accuracy	±2°C @ -20°C (-4°F), ±0.5°C @ 25°C (77°F), ±1.0°C @ 65°C (149°F)
Battery Capacity	1450mAh**
Battery Type	LiPo

\* Subject to change
